

Production woodworking enterprise full cycle of wood processing. From the round wood to the finished product. The company is located in the city of Chernigov, looking for permanent partners in the European market.

Our company is interested both in selling its product to the European market and is ready to provide its areas for the opening of a sales office in Chernigov. (I, as a manager, have vast experience in sales and construction of a distribution network.), As well as in joint cooperation and investments.

The enterprise has its own production and office premises about 1500 m², has its own drying chambers and production halls.

It is located in the city of Chernigov, on the territory of 5000 m²

We have experience of cooperation with German, Polish, Dutch customers, as well as with customers from Georgia, Turkey and Moldova.

We have several production lines:

1. Production of ice cream sticks. We produce up to 10-12 million pieces of sticks per month. Our company has a full production cycle. The products are made from selected varieties of birch, linden and alder, by cutting the final billet and further polishing the stick itself, which gives our products an advantage over the wand of the Chinese, European and domestic producers who manufacture the wand by peeling and further stamping. Our wand has no irregularities, chipping and roughness, which can damage the mouth of the customer ice cream. Our wand does not have an unpleasant, repulsive taste, which creates a nausea and distorts the taste of ice cream, as in the case of a stamped stick. The whole stick is packed on a filling machine in cassettes of 50 pieces, and in boxes with a cellophane bag. We provide a price significantly lower than the manufacturers from China, Lithuania. Interested in selling this product to the European market. The target audience is manufacturers of ice cream on a stick. On the same equipment, we can produce medical ENT-SHPATEL disposable, agitators for hot drinks. Target audience - medicine, distributors, sellers of coffee and tea, disposable dishes, other trade organizations.

2. Manufacturing of furniture from natural wood under individual orders, tables, curbstones, cabinets, stools, steps, other products, cabinet furniture from MDF and chipboard. Target audience - end-users, retail.

3. Production of laminated timber, including glued laminated timber from valuable species of wood - oak, ash, as well as pine and linden. Target audience - manufacturers of windows, doors. The maximum volume of production is up to 30 m³ per month. There is an opportunity to increase the volume provided investment and the addition of equipment.

4. Production of molded products, namely - lining, flooring board, house block and other products, for interior decoration inside and out. The target audience is construction companies.

5. Production of slats for beds and other purposes. The target audience is the manufacturers of furniture.

6. We render services on drying of wood. The volume of drying chambers is up to 120-140 m³. The target audience is seller-importers from Ukraine, lumber, consumers of raw materials and material from Ukraine in Poland.

7. We produce comfortable sets of firewood complete with a "PINE-KEY" briquette for a picnic or fireplaces.

8. We are interested in the sale of dry lumber, the possible opening of a representative office and a trading platform in Poland.

9. Interested in investment, it is possible to create a joint venture, to update the production base.

Best regards.
